EDUCATION

B.S. in Computer Science/Mathematics Minor, Expected 12/2026
Pittsburg State University - Pittsburg, KS

- All A Scholastics Honoree: 09/2023 - Present
- Computer Science Club President: 09/2025 – Present

CERTIFICATIONS

Claude Partner Network Learning Path (Anthropic), 05/2026

- Completed a four-module path including coverage of Agent Skills and MCP (Model Context Protocol).

PROFESSIONAL SUMMARY

Computer Science and Mathematics student with full-stack development experience spanning frontend interfaces, backend services, and data processing. Comfortable building modular, reusable UI with Tailwind CSS and design system workflows on the frontend, and working with Python, SQL, and REST APIs on the backend. Competent AI-assisted developer who thrives in the CI/CD pipeline to rapidly iterate, refine, and ship quality, production ready software.

EXPERIENCE

Contract Developer, 03/2026 - Present
LimeLight Marketing – Pittsburg, KS

- Built reusable UI components within v0 design systems using PHP and Tailwind CSS.
- Leveraged AI assisted development tools to accelerate component creation, iteration, and refinement while maintaining code quality and consistency.
- Worked within company CI/CD pipelines to submit components for review, respond to revision feedback, and ensure production readiness.
- Translated design and content requirements into modular, scalable components, improving development efficiency and consistency across multiple projects.

Data Science Intern, 04/2025 - 06/2025
Rooted Ag – Fort Scott, KS

- Built scalable Python/Pandas scripts to clean and format contact datasets.
- Standardized and restructured the Pipedrive CRM database to improve usability, enabling more effective segmentation and driving sales through targeted email campaigns.
- Developed classification logic and automated labeling rules for contact categorization, supporting efficient customer follow-up processes and improving retention efforts.

PROJECTS

- **Reverse Engineering Platform**: 10/2026 – Developed a Python/FastAPI platform for Windows PE binary analysis using LIEF and Capstone, extracting metadata, strings, imports, and x86-64 disassembly into structured evidence for AI-assisted interpretation.
- **ContractorOS**: 07/2026 – Built a full-stack contractor management platform using FastAPI, React/TypeScript, PostgreSQL, and Tailwind CSS. Implemented JWT authentication, REST APIs, relational data models, client/project management, time tracking, and dashboard analytics.
